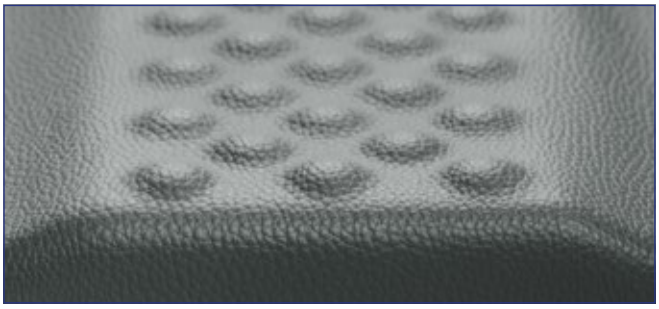
PROFIMAT® knee cushion – product data sheet



Application

The PROFIMAT® knee cushion is an anatomically formed product for the highly sensitive knee joints, which react strongly to incorrect loading and high strain.
Frequent working in a kneeling position leads to pain, injuries and chronic health problems. The knee shells with additional, comfortable knee padding, ensure optimum pressure distribution of the body weight, relief of the lower legs and a significant reduction in pressure on the knee joints. The cushioning and flexible material adapts to individual body conditions.

- Lowers the signs of fatigue in feet, legs and the back
- Longlasting, easy-care and antislip
- Resistent against oil, fat and many chemicals
- Easy to clean
- Protects against wetness, cold, dirt and injuries
- Practical handle shape for easy transport

The PROFIMAT® knee cushion is ideally suited for all work that is carried out while kneeling
- Crafts
- Production
- Trade and services
- Gardening
- Renovation work
- All domestic work that is done on the knees

Product design	
Colours	grey
Surface	leather-look

Dimensions / Tolerances	
Dimensions	410 x 350 x 80 mm

Material

polyurethane foam
